

EXHIBIT B

*For shares held at the end of the class period, damages are calculated by multiplying the shares held by the average share price during the 90 calendar days after the end of the class period. The price used is \$1.44 as of October 05, 2007.

**For post-class period sales, either the actual price or the mean price (end of class period to the actual post-class sale) will be used depending on which value is higher.
